Education

Chico State University

Bachelor of Science in Computer Science
Cybersecurity Minor

GPA: 3.8

Expected Graduation: May 2026

Technical Skills

Languages & Frameworks: C++, Java, C, TypeScript, React, SQL, Dart, Flutter
Tools & Platforms: Git, GitHub, Vercel, Linear, Google Cloud, Postmark, Figma
Languages: English (Native), French (Proficient)

Work Experience

- **Software Developer Intern: Bushido (bushido.is)** June 2025 - Present
 - Developed and deployed new web features using TypeScript and React, including a thumbnail auto-picker and user email notifications via Postmark.
 - Designed and executed SQL queries on Neon Database for data generation and testing workflows.
 - Collaborated with a distributed dev team using Git/GitHub for version control: opened and reviewed pull requests, resolved merge conflicts
 - Contributed to CI/CD workflows with GitHub + Vercel, ensuring smooth deployments
- **Warehouse Associate: Fine Wines International** Summers and Winters 2022-2025
 - Maintained 100% punctuality record and consistently met productivity goals.
 - Collaborated with team members in fast-paced warehouse operations.
 - Used time management to balance work with internship and classwork

Projects

- **Sticker Sales Website - Personal**
 - Built an e-commerce platform using TypeScript/React, with Stripe payments, Google Cloud hosting, and Google Auth system for secure login.
 - Designed and implemented front-end UI/UX for client's sticker business.
 - Utilized Git version control to manage development, track changes
- **Filesystem Performance Benchmarking - Chico State University**
 - Benchmarked multiple Linux filesystems (ext4, ext2, XFS, ZFS, FAT32) on Google Cloud Compute using shell scripting
 - Implemented mounting, formatting, and cache management to analyze read/write performance for small and large files
- **Roommate Circle App - Chico State University**
 - Developed a cross-platform mobile app in Flutter/Dart for roommate groups to chat, share leases, and manage invites.
 - Designed UI prototypes in Figma and implemented responsive layouts in Flutter.
 - Integrated Google Firebase Authentication for secure login and Firestore for real-time data storage.
 - Added Google Maps API features for location-based functionality.
